

# MULTILATERAL IVG MEETING IN TURIN

15-16-17 February 2012

## Report from the Turin students

### IVG 1 Media club

#### Photos for flyer

##### Activities

In the international Comenius meeting, we, students of photography, had the job to take pictures of the participants, portraits and group photos, in order to realize the flyer of the event. We prepared the sets, one for the portraits and one for group photos, with the lights and the backgrounds.

##### Comments

It was a very interesting meeting because we met people of other countries. Working in the club was very useful because we had the opportunity to confront our ideas with theirs, talk in English and to take photographs; for us that study photography it was like a simulation of work!

#### Flyer

##### Activities

During the meeting in Turin we decided to produce a flyer together with the German students. The flyer was part of our project, we shared our work with them and that was good. Other members of the media club took some pictures (students' portraits) and the final result is a flyer that contains the logo, some information about the project and photos. If you open it there are 12 different squared sides.

##### Comments

We were quite satisfied with it.

*Davide Sieve and Giovanni Vartolo 5<sup>A</sup>H*

## **Website**

### **Activities**

I worked on the theme and the logotype of the project site together with two German students.

### **Comments**

I think that this activity was very interesting, I really liked working with the two German guys , I learnt lots of new words. I love Comenius SCENA!

*Jacopo Zuffa 5^F*

## **IVG 2 Travel club**

### **Video calendar**

#### **Activities**

On Wednesday and Thursday morning, together with the Polish and Spanish groups we started to examine their materials and together we started to assemble them, just a couple of seasons. We worked with the help of a specific graphics programme.

#### **Comments**

Initially we had some problems with the different formats of the materials of foreign students, but after a while we managed to understand how to handle with them and we started working. It was a very nice experience, although the work needs to be finished.

*Valentina Degli Esposti 5^G*

## **IVG 3 Eco club**

### **Eco survey**

#### **Activities**

The focus of the eco club during the meeting in Turin on 15<sup>th</sup>-17<sup>th</sup> February was a survey. It was about the ecological habits of students indoors and outdoors. All of the students in our class (5^ H) worked hard for two days and finally we got the results of about 350 students in our school. In the next future we'll process the data and publish the results.

#### **Comments**

It has been an amazing experience. Each of us has given their contribution and everything has gone very well.

*Marco Ritardo and Loris Dedamiani 5^H*

## **IVG 4 Music club**

### **Creation of a song**

#### **Activities**

With the music club we had a chance to make a song that talks about Torino. We went to a music studio and played it, and we listened to the Polish song. We then tried to make a new song with them, and with the girls from Parma that came to Turin for one day. We still have to work on it, but I'm pretty sure it will work out very well.

#### **Comments**

The Comenius SCENA was a good experience, because it is good to share our project with others. It was nice to show our school, our city, and to get to know our foreign friends. A good point of the project is that we can practise our English. It was fun to see different cultures, the way people from other countries speak and live, to hear about their country and their culture.

*Doriano Ventura 5^F*
